

Awning Systems

Sunselect

For the price-sensitive customer, this lateral arm awning is available in projections of 10'2" and 11'10", with varying widths up to 20'. It maintains a steel square bar, steel roller, double and triple cable spring-loaded arms, and most importantly, an adjustable pitch bracket. The system carries a 5-year warranty and can be sold with a hood. The frame is available in white, with any color Recacril fabric. Mounting options include wall, soffit, or roof. Awnings are available with a 4' white or ivory mesh drop which descends from the front of the awning. If motorized, this awning will include a Simu motor with an 18' plug-in cord and an indoor remote.

Sunselect

For the price-sensitive customer, this lateral arm awning is available in projections of 10'2" and 11'10", with varying widths up to 20'. It maintains a steel square bar, steel roller, and double and triple cable spring-loaded arms with an upgraded arm bracket. The system carries a 5-year warranty and can be sold with a hood. The frame is available in white, with any color Recacril fabric. Mounting options include wall, soffit, or roof. Awnings are available with a 4' white or ivory mesh drop which descends from the front of the awning. If motorized, this awning will include a Simu motor with an 18' plug-in cord and an indoor remote.

Sunrise

The Sunrise lateral arm awning is available in projections up to 13'1", with no width restrictions. It maintains a steel square bar and roller tube. The triple cable, spring-loaded arms offer the strength needed for longevity. The tilting arms close completely and offer outstanding fabric protection, while simultaneously activating the automatic wind-lock. The system carries a 10-year warranty and can be sold with or without a hood in two frame colors. Over 200 fabric choices are available. Mounting options include wall, soffit, or roof.

Little-Big

Where conventional awnings stop, the Little-Big starts. This awning has all the features of the Sunrise, but with crossing arms allowing units to be made with less width than projection. It is now possible to install a full size awning even in the most limited spaces. The system carries a 10-year warranty and can be sold with or without a hood in two frame colors. Over 200 fabric choices are available. Mounting options include wall, soffit, or roof.

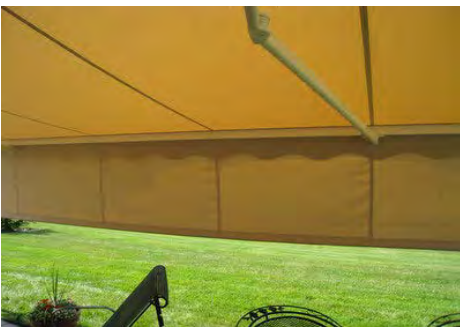

Toga

Providing ultimate fabric protection, this cassette awning system has the roller tube encased in a clamshell of aluminum. When fully retracted, the fabric is completely surrounded with only the valance remaining exposed. It carries all the features of the Sunrise and is available in widths up to 23'. The system also carries a 10-year warranty and is best used for roof-mounting applications. It is available in two frame colors with over 200 fabric choices. Mounting options include wall, soffit, or roof.

Toga/Little-Big

This awning is a combination of the cassette awning and the crossing arm system, available in widths from 4' to 14'. The system also carries a 10-year warranty and is best used for roof-mounting applications. It is available in two frame colors with over 200 fabric options. Mounting options include wall, soffit, or roof.

Retractable Drop

A retractable drop is a vertical extension of the fabric cover at the front of the awning. It allows the fabric to be lowered from the front bar using a simple gear mechanism. This makes it possible to curtail horizontal sun and provide privacy. Retractable drops may be used on any awning up to 19' in width. On larger widths, the projection must be 10' or less. Drops of 4' are available in acrylic fabric or mesh. Drops of 6' are available in acrylic fabric only.

Vario-volant Vertical Drop

A vario-volant is a self-storing vertical drop of fabric on a roller tube. It can be raised or lowered using a gear mechanism. The gear rotates the roller tube, moving the fabric vertically along the side cable guides. Vario-volant drops are available in widths of 3' to 23'. Drops of 4' are available in acrylic fabric or mesh. Drops of 6' are available in acrylic fabric only.

Small Window Awning

Spring-loaded vertical arms are used for smaller, single window installations and can be driven by a tape or a gear. The frame is available in white or tan with widths up to 12' and projections ranging from 2'4" to 3'4". The aluminum extrusion is powder-coated and there is no need for a protective hood, as all fabric, when retracted, sets in an aluminum clamshell. This unit allows for a 160 degree drop for full sun protection.

Large Window Awning

This unit is a heavy-duty awning with vertical drop arms. It can be wall or soffit mounted and driven by a gear or a motor. An optional hood is available. Widths vary up to 30'0" with projections ranging from 2'4" to 5'8". This unit also allows for a 160 degree drop for full sun protection and is available with a white or tan frame.

Square & Casement Window Awning

Custom covers are made to fit a slip-fit pipe frame using pockets or rafter covers. These covers are removable in the winter months. Welded frames are also available which can provide a more permanent structure. This cover is stapled into the frame and the cover is not removable.

Stationary Patio Awning

Stationary patio covers are custom-made to fit a pipe frame using rafter covers. We use 35 molding which provides an excellent time-saver during installation and yearly cover removal. All frames are furnished with a double front bar. These covers are expected to be removed in the winter months. Welded frames are also available in this style which can provide a more permanent structure.

Unique Awnings

Many other unique awning styles are available upon request.
